

Automotive Oil Filter Adapter

This oil filter adapter is designed for automotive applications. Constructed from cast aluminum, it includes threaded ports for filter and oil line connections, as well as mounting holes.

Product Overview

High-Performance Oil Filter Adapter

This automotive oil filter adapter is engineered for robust performance in demanding automotive applications. Constructed from durable cast aluminum, it provides a reliable interface for oil filtration systems. The unit features a central threaded port for secure filter attachment and auxiliary ports for oil lines, ensuring efficient fluid management and easy installation.

Technical Specifications

Port Configuration

- Central threaded port for filter
- Dual threaded ports for oil lines

Material	Cast Aluminum
Surface Finish	Machined
Mounting	Bolt-on with integrated mounting holes

Key Features

Performance Attributes

Corrosion Resistant • Precision Sealed • Durable Construction
