

# Automotive Oxygen Sensor

This oxygen sensor delivers accurate and reliable measurements of oxygen levels in exhaust gases. It is designed for efficient engine management and reduced emissions in a wide range of vehicles.

## Overview

### High-Performance Automotive Oxygen Sensor

This automotive oxygen sensor is engineered to provide precise and reliable measurements of oxygen levels within exhaust gases. By facilitating efficient engine management, it helps optimize fuel combustion and significantly reduce vehicle emissions. Built with robust materials and precise sensing elements, this component ensures long-term durability and consistent performance across a wide variety of vehicle makes and models.

## Technical Specifications

### Available Sensor Configurations

Sensor Technology	Configuration
Thimble Type	1, 2, 3, 4 wires
Planar Type	4 wires

### Reference Part Numbers

- CN1BL000-001 33011
- CN1BL000-001 33111
- CN1BL000-001 33211

## Compatibility

### Vehicle Brand Compatibility

BMW, VW, Audi, Benz, Peugeot, Seat, Skoda, Saab, Ford
