

Automotive Ozone Air Purifier with Timer

This compact ozone generator is designed for air purification in vehicles. It features a timer-controlled ozone output for effective odor elimination and air sterilization.

Overview

Professional Automotive Ozone Purification

This high-performance ozone generator utilizes advanced quartz discharge technology to provide effective, broad-spectrum sterilization for vehicle interiors. Designed for efficiency and ease of use, it eliminates bacteria, viruses, and odors without the need for auxiliary materials. Its compact, stainless steel construction ensures durability and reliable performance for professional air quality management.

Performance Metrics

Sterilization & Purification Rates

99.9 %

Pathogenic Bacterium Removal

99 %

COVID-19 Bactericidal Rate

98 %

PM2.5 Removal

96 %

Formaldehyde Purification

Technical Specifications

Core Technical Data

Parameter	Value
Ozone Output	3.5 g/h
Circulating Air	e 480m³/h
Disinfection Area	30 m³
Power Consumption	60 W
Voltage	220V 50Hz
Noise Level	d 55db

Timer Control

0-60 minutes

Physical Characteristics

Dimensions & Weight

- Unit Size: 160 x 160 x 202 mm
- Package Size: 165 x 165 x 210 mm
- Weight: 4 kg

Construction Material

Stainless steel

Operational Features

Key Features

Quartz Discharge Technology, No Auxiliary Materials Needed, Dead-angle Free Disinfection, Timer Controlled, Stable Performance
