

# Automotive Paint Rubbing Compound

This rubbing compound removes scratches, swirl marks, and oxidation from automotive paint. The silicone-free formula ensures compatibility with paint and body shops, preventing surface defects and restoring gloss to weathered paint.

## Product Overview

### Professional Grade Rubbing Compound

This high-performance rubbing compound is engineered for professional automotive detailing to effectively remove surface imperfections. Its specialized silicone-free formula prevents surface contamination, making it ideal for use in body shops and painting environments. The compound restores deep gloss and clarity to clear coats, lacquers, and enamels, ensuring a flawless finish on weathered paint.

## Technical Specifications

Model Number	MA-11604
Compatible Finishes	Clear Coat, Lacquer, Enamel
Application Method	Machine application with polishing pad

## Key Features

### Formula Characteristics

Silicone-Free • Scratch Removal • Swirl Mark Removal • Oxidation Removal

### Performance Benefits

- Prevents fish-eye defects
- Restores paint gloss and clarity
- Compatible with paint and body shop environments
