

Automotive Parking Sensor System with LCD Display

Parking sensor system includes an LCD display and multiple ultrasonic sensors. It detects obstacles behind the vehicle, providing visual and audible alerts based on distance.

Product Overview

Advanced Parking Assistance

This automotive parking sensor system is designed to significantly enhance safety and convenience during parking maneuvers. Featuring a digital LCD display, the system provides real-time distance readings and audible alerts to help drivers detect obstacles behind the vehicle. The kit includes a compact control unit and multiple ultrasonic sensors, ensuring comprehensive coverage and easy integration into most vehicle types.

Technical Specifications

System Components

- LCD Display Unit
- Control Box
- Ultrasonic Sensors

Model Number	ATS-078
Alert Methods	Visual (LCD), Audible

Key Features

Core Benefits

Obstacle Detection • Distance Monitoring • Easy Installation • Enhanced Parking Safety
