

# Automotive Parking Sensor System with LED Display

Parking sensor system includes an LED display for clear visual alerts. Multiple sensors ensure accurate obstacle detection for safer parking.

## Overview

### Automotive Parking Sensor System

This automotive parking sensor system is designed to provide drivers with increased safety and precision during parking maneuvers. The kit includes an LED display unit, a control box, and multiple sensors for comprehensive obstacle detection. It is a reliable solution for upgrading vehicle safety features and preventing collisions.

## Technical Specifications

### Detection Distance

**0.4 m**

Detected Proximity

### Included Components

- LED Display Unit
- Control Box
- Parking Sensors

### Display Type

LED Display
