

Automotive Polisher

The automotive polisher is a power tool used for buffing and polishing vehicle surfaces. It is designed to remove swirl marks, scratches, and oxidation, leaving a smooth and glossy finish.

Product Overview

Professional Automotive Polisher

This automotive polisher is a versatile power tool engineered for buffing and polishing vehicle surfaces to achieve a professional-grade glossy finish. Designed with an ergonomic dual-handle configuration, it ensures maximum control and comfort during operation, making it ideal for removing swirl marks, light scratches, and oxidation. The unit comes complete with essential accessories, including a terry cloth bonnet and a synthetic wool bonnet, providing everything needed to start applying wax, sealant, or polish immediately.
