

Automotive Pressure Transducer

This pressure transducer is designed for automotive applications, measuring pressure in various systems. It features a robust construction with a threaded connection and electrical connector for transmitting pressure readings to the vehicle's control system.

Product Overview

High-Precision Automotive Pressure Transducer

This automotive pressure transducer is engineered to provide precise pressure monitoring for vehicle air conditioning and fluid management systems. Featuring a robust, durable construction, it is designed to withstand harsh operating environments while ensuring consistent signal integrity to the vehicle's control unit. Its standardized connector and mounting design allow for seamless integration and secure installation in a wide variety of automotive applications.

Technical Specifications

OE Reference Numbers	9647971280, 52CP1005, 23KBMX13
Component Type	A/C Pressure Switch / Sensor

Compatibility

Compatible Vehicle Models

- 1007
- 206
- 207
- 307
- 3008
- 308
- 406
- 407
- 5008
- 607
- 807
