Product Overview

High-Performance Engine Cooling

This automotive radiator cooling fan is engineered for optimal airflow and efficient engine heat dissipation. Constructed from durable, heat-resistant materials, it is designed to meet or exceed original equipment specifications. It provides a precise, reliable fit to prevent overheating and maintain consistent engine temperatures under demanding conditions.

Technical Specifications

Compatible Vehicles

- Mercedes-Benz

Design & Function

Direct OEM Replacement • High-Airflow Multi-blade Design • Heat-Resistant Housing • Electric Powered

Material Composition

PA66+GF30 (Glass Fiber Reinforced Polyamide)

OEM Reference Numbers

2215001193, 2215000993, 2215000493
