Product Overview

High-Performance Automotive Antenna Solutions

This versatile automotive antenna series supports integrated TV, radio, and GPS signal reception for various vehicle platforms. Engineered for durability, the units are built to withstand environmental exposure, high-speed vibrations, and varying road conditions. The collection includes both traditional whip-style antennas for optimal reception and modern aerodynamic shark fin designs to enhance vehicle aesthetics while reducing wind drag.

Technical Specifications

Available Designs

Whip Antenna • Shark Fin Antenna

System Compatibility

- Integrated GPS navigation support
- Multi-connector audio system compatibility
- Cellular connectivity ready
- Color-coded connectivity modules (Purple, Yellow, Blue)

Supported Signals

Radio (AM/FM), GPS, TV Signal
