

# Automotive Radio Antenna

This car antenna is designed for receiving radio signals in vehicles. It features a cylindrical antenna element connected to a coaxial cable for reliable signal reception.

## Product Overview

### Automotive Radio Antenna

This automotive radio antenna is engineered to provide reliable signal reception for car audio systems. It features a durable, black cylindrical antenna element paired with a flexible coaxial cable for easy installation. Designed for standard automotive applications, it ensures consistent performance and longevity.

## Technical Specifications

Antenna Type	Automotive Radio Antenna
Color	Black
Design Features	Cylindrical Element, Flexible Coaxial Cable
Model Identifier	YJ8077
