

Automotive Rear View Camera

This high-resolution rear view camera is designed for automotive applications. It features a wide-angle lens for enhanced visibility and easy installation using standard RCA connectors.

Product Overview

High-Performance Rear View Camera

This automotive rear-view camera is engineered to enhance vehicle safety and driver convenience during parking and maneuvering. Featuring a high-resolution sensor and a wide-angle lens, it provides clear visibility of the area behind the vehicle. Its durable construction ensures reliable performance even in challenging weather conditions, while the standard RCA and DC power interfaces allow for straightforward installation.
