

Automotive Reflector for Vehicle Lighting Systems

This automotive reflector enhances visibility and safety in vehicle lighting systems. It is suitable for use in tail lights, brake lights, and side marker lights to alert other drivers and pedestrians of the vehicle's presence.

Product Overview

Automotive Reflector for Vehicle Lighting Systems

This high-quality automotive reflector is specifically engineered to enhance visibility and safety in modern vehicle lighting systems. Featuring a circular design with a diameter of 55mm, it provides optimal light reflection to effectively alert drivers and pedestrians of a vehicle's presence. Built with durable materials, this component is designed for long-lasting performance and reliable operation under various environmental conditions.

Technical Specifications

Diameter	55 mm
Model Identifier	YJ-FS003

Application Details

Suitable Applications	Tail Lights, Brake Lights, Side Marker Lights
-----------------------	---

Quality and Performance

Key Features

- Enhanced visibility for increased road safety
- Durable housing for environmental resistance
- Optimal light reflection properties
