Product Overview

High-Performance Automotive Ribbed Belt

This high-performance automotive ribbed belt is engineered for robust transmission systems requiring optimal power transfer. Featuring a specialized 6-rib construction, it provides superior grip to reduce slippage during high-demand operation. Built with advanced materials, this belt offers long-lasting resistance to heat, oil, and general wear for extended service life.

Technical Specifications

Belt Profile	6PK
Reference Part Number	6 PK 1199
Rib Count	6

Certifications and Quality

Quality Certifications	ISO/TS 16949, CNAS, IAF, TSE
------------------------	------------------------------

Product Features

Performance Features

Anti-Static • Heat Resistant • Oil Resistant • Wear Resistant
