

Automotive Rubbing Compound

This rubbing compound effectively removes damage spots, dirt, and paint oxidation. It restores and protects the paint surface, leaving a smooth, glossy finish.

Product Overview

Professional Grade Paint Restoration

This super duty rubbing compound is a high-performance solution designed to effectively remove damage spots, dirt, and paint oxidation from various surfaces. It not only restores the original luster of the paint but also provides a protective layer against environmental elements. The formula is engineered for ease of use, allowing for effortless application and buffing on cars, boats, and other painted objects.

Identification

Model Number	MA-11597
--------------	----------
