Overview

Professional Automotive Scissor Lift

This portable scissor car lift is engineered for efficient vehicle maintenance and repair in professional workshops and garages. Constructed from heavy-duty steel, it features a reliable hydraulic lifting mechanism and an integrated safety locking system for secure operation. The design includes adjustable platforms with rubber pads and built-in wheels, ensuring both stability and maneuverability for various automotive tasks.

Performance Specifications

Lifting Capacity

5500 lbs
Capacity

3000 kg
Capacity

Maximum Lifting Height

1.2 m

Construction & Design

Material Construction

Heavy-duty steel frame

Key Features

Hydraulic Mechanism, Portable Design, Safety Locking System, Adjustable Platforms, Rubber Pads

Mobility

Yes
