

Automotive Shock Absorber

High-performance shock absorbers designed for enhanced vehicle stability and ride comfort. Available in various colors including blue, black, and red, these shock absorbers provide excellent damping characteristics, reducing vibrations and improving handling.

Product Overview

High-Performance Automotive Shock Absorber

These shock absorbers are engineered to deliver superior vehicle stability and enhanced ride comfort across various automotive applications. Featuring a robust construction with a chrome-finished piston rod and a durable coil spring, they are built for longevity and performance. The design effectively reduces vehicle vibrations and improves overall handling, ensuring a smooth and controlled driving experience.

Technical Specifications

Key Features

- Chrome-finished piston rod
- Robust coil spring design
- Enhanced damping characteristics
- Improved vibration reduction

Available Colors

Blue, Black, Red
