Product Overview

High-Performance Suspension Solution

This automotive shock absorber with integrated coil spring is engineered for specialized applications, providing superior damping and vehicle control. Designed for durability and reliability, it ensures a smooth, stable ride even in demanding road conditions. This component serves as an ideal aftermarket replacement or upgrade, supporting enhanced suspension performance across a variety of vehicle types.

Technical Specifications

Primary Application

Aftermarket Service • Suspension Upgrade • Vehicle Replacement Part

Construction Details

- Robust mounting loop for secure attachment
- Hydraulic damper for motion control
- Engineered for long service life
- Includes necessary brackets and fittings

Component Type

Strut Assembly with Coil Spring

Key Features

Hydraulic Damping, Coil Spring Support, Integrated Mounting Hardware, Enhanced Stability
