Product Overview

Professional Automotive Snail Horn

This high-performance snail horn features an exclusive acoustic design that produces a soft, melodic tone through pulsating air column propagation. Engineered for reliability, it includes patented microporous filter technology to protect against dirt, humidity, and corrosion in harsh environmental conditions. The compact, weather-resistant construction ensures easy installation and long-term durability for various automotive applications.

Technical Specifications

Construction Materials

- ABS Plastic Shell
- Manganese Steel Click
- Copper / Aluminum Coil
