

Automotive Starter Motor

This high-performance starter motor is designed for various engine applications. It features robust construction, ensuring reliable operation and extended service life.

Product Overview

High-Performance Starter Motor

This 12V automotive starter motor is engineered for reliable engine ignition across various LADA and compatible vehicle platforms. Featuring a robust 1.5kW power output, it is designed for durability and consistent performance in demanding conditions. Its construction includes heavy-duty components such as a high-torque armature and efficient solenoid engagement, ensuring quick and consistent engine starts.
