

Automotive Steering Pump Housing

Precision-engineered for optimal performance and durability in automotive steering systems. It provides a secure and stable mounting for steering pump components, contributing to smooth and responsive steering control.

Product Overview

High-Precision Steering Pump Housing

This steering pump housing is precision-engineered to ensure optimal performance and durability within automotive steering systems. Constructed from high-quality aluminum alloy, it features robust design and precise machining for accurate component fitment. Its corrosion-resistant finish and structural integrity provide reliable operation and responsive steering control under demanding automotive conditions.

Technical Details

Material	Aluminum Alloy
Manufacturing Process	High-Pressure Die-Casting
Key Features	Precision Machined, Corrosion Resistant, Robust Construction, High Durability

Certifications & Quality

Quality Standards

ISO 9001:2000 • ISO 9000:1998

Application Scope

Target Industries

- Automotive Manufacturing
- Motorcycle Manufacturing
- Aircraft Manufacturing
- Hydraulic Control Systems
- Food Machinery
- Textile Machinery
