

Automotive Steering Tie Rod

This is a crucial component in a vehicle's steering system. It connects the steering knuckle to the steering rack or linkage, transmitting the force that turns the wheels.

Product Overview

Steering Tie Rod for Mitsubishi Delica

This automotive steering tie rod is a critical component designed for precise steering control and reliable suspension performance. It facilitates the connection between the steering knuckle and the steering linkage, ensuring smooth force transmission when turning. Built for durability, this part is engineered to maintain alignment and handle the articulation required during vehicle operation.

Compatibility

Compatible Models

- Delica (L300)
- L031P
- L034P
- L031PV
- L032PV

Vehicle Make	Mitsubishi
