

Automotive Suspension and Steering Components Set

This set includes various automotive suspension and steering components. These parts are essential for vehicle handling, stability, and ride comfort, ensuring optimal performance and safety.

Product Overview

Automotive Suspension and Steering Precision

This comprehensive set of automotive suspension and steering components is engineered to maintain vehicle handling, stability, and ride comfort. The collection includes essential hardware such as hydraulic suspension assemblies, rubber-metal bumper bushings, strut mounts, and control arms. Designed for high-performance durability, these parts ensure optimal safety and are available for customization based on specific client samples or technical drawings.

Compatibility

Compatible Vehicle Makes

VW, AUDI, Mercedes-Benz, Opel, Ford

Technical Specifications

Included Components

- Hydraulic suspension assembly
- Rubber and metal bumper bushings
- Strut mounts
- Vacuum boosters
- Control arms

Custom Production

Yes
