Product Overview

High-Performance Suspension Control Arm

This automotive suspension control arm is engineered for the Toyota HIACE (2005- models). It serves as a critical link between the wheel hub and the vehicle frame, ensuring controlled movement, stability, and handling. Constructed with high-quality steel and rubber, this component is designed for durability and vibration reduction, providing a reliable solution for automotive suspension maintenance.

Technical Specifications

OEM Reference Number	48066-29225
Compatible Vehicle	Toyota HIACE (2005-)
Construction Materials	Steel, Rubber
Surface Finish	Corrosion-resistant black finish

Key Features

Component Highlights

- Integrated bushings for vibration absorption
- Ball joint included for smooth articulation
- Durable construction for enhanced vehicle handling
- Yellow-zinc plated hardware included
