

Automotive Tempered Glass

Tempered glass is manufactured by heating and rapidly cooling the surface uniformly with air. This process enhances the glass's strength, making it suitable for vehicle windows and ensuring it fractures safely upon impact.

Product Overview

Engineered for Safety and Performance

This premium automotive tempered glass is engineered for superior durability and enhanced safety. Designed to withstand significant impacts, it shatters into small, blunt fragments to protect vehicle occupants. With excellent optical clarity, it provides optimal visibility and is a reliable solution for replacing worn or damaged vehicle windows.

Technical Specifications

Safety Standard

Impact Resistant • Shatter-Proofing

Material	Tempered Automotive Glass
----------	---------------------------

Optical Quality	High clarity
-----------------	--------------

Applications & Usage

Primary Applications

- Vehicle window replacement
- Automotive glass repair
- Custom vehicle fitments

Compatibility	Multiple vehicle models, Various sizes available, Custom shapes
