

Automotive Tire Changer

This tire changer is designed for efficient tire mounting and demounting. It features a clamping system to securely hold wheels, a pneumatic bead breaker, and a rotating turntable.

Overview

Versatile Automotive Tire Changer

The Tire Changer BL505F is a robust and versatile machine engineered for efficient tire mounting and demounting in professional service environments. It features a high-performance pneumatic bead breaker and a secure clamping system designed to handle a wide range of wheel sizes with precision. Built for durability and ease of use, this equipment streamlines the tire replacement process while ensuring safety and reliability.

Key Features

Best For

- Professional automotive service centers
- Tire mounting and demounting
- Diverse wheel size handling

Operational Capabilities

Pneumatic Bead Breaker, Rotating Turntable, Secure Clamping, Professional Grade
