

Automotive Tire Changer

Professional tire changer designed for automotive service centers. It features a robust clamping system, pneumatic bead breaker, and ergonomic controls for efficient tire removal and installation.

Product Overview

Professional Grade Automotive Tire Changer

This professional tire changer is expertly engineered for high-volume automotive service centers, combining robust construction with user-friendly ergonomics. It features a heavy-duty pneumatic bead breaker and a versatile clamping system designed to handle a wide range of wheel and tire combinations. This equipment is built to streamline the tire removal and installation process while maintaining long-term durability in demanding workshop environments.
