

Automotive Turbocharger

This turbocharger enhances engine performance by forcing more air into the combustion chamber. It is engineered to increase horsepower and torque, improving overall vehicle efficiency.

Product Overview

High-Performance Automotive Turbocharger

The BV43 Turbocharger is precision-engineered to significantly enhance engine performance by forcing additional air into the combustion chamber. Designed for durability and longevity, this unit features robust construction capable of withstanding extreme temperatures and high boost pressures. Its optimized design ensures minimal lag and improved airflow, delivering a more responsive driving experience and increased overall vehicle power.

Technical Identification

Model	BV43
Part Number	53039700168
OEM Reference	1118100-ED01A

Performance Features

Key Benefits

- Increased horsepower and torque
- Improved engine efficiency
- High-temperature resistance
- Reduced turbo lag
- Reliable boost pressure

Construction	Robust Design, High-Pressure Resistant, Heat Resistant, Precision Engineered
