Product Overview

High-Performance Automotive Turbocharger

This premium automotive turbocharger is engineered to significantly boost engine performance by increasing intake air density. Constructed from durable steel, the unit offers robust reliability for demanding automotive applications. Each assembly includes essential gaskets to ensure a seamless installation process for professional technicians.

Technical Specifications

Net Weight	14 Kg
Material	Steel

Performance Metrics

Key Functional Benefits

- Increased engine power output
- Improved intake density
- Forced induction efficiency

Package Contents

Included Components	Turbocharger unit, Installation gaskets
