

Automotive Two-Post Floor Plate Lift

This two-post floor plate lift is a robust and reliable lifting solution for automotive maintenance and repair. It features durable steel construction and a high lifting capacity for a wide range of vehicles.

Overview

Professional Automotive Lifting Solution

The Automotive Two-Post Floor Plate Lift is a robust and reliable lifting solution designed for professional automotive maintenance and repair. Featuring durable steel construction and a floor plate design, it ensures stability and ease of installation while maximizing workshop space. With dual hydraulic cylinders and advanced safety mechanisms, this lift provides smooth, controlled operation for a wide range of vehicles.

Performance & Safety

Load Capacity Testing

115 %

Dynamic Load Capacity

150 %

Static Load Capacity

Safety Features

24V Height Limit Switch, Feet-protection Guardrails, Door-opening Protection, Mechanical Lock Release

Technical Details

Control Features

- Adjustable rate of decline via hydraulic throttling device
- Manual mechanical lock release from both sides
- Spiral and stage-adjustable rubber pads

Lifting Mechanism

Dual cylinder with plate and wire rope chain balance system
