

Automotive Wheel Balancer

This is a wheel balancer. It is used to balance automotive wheels.

Product Overview

Professional Automotive Wheel Balancer

This advanced wheel balancer features a high-definition 21-inch LCD interface running on an Android operating system to provide intuitive control and educational support. Engineered for precision, it utilizes a high-frequency elector raster and an aluminum alloy rotating arm to ensure accurate measurements for all tire types. The design includes improved electrical interference protection and robust mechanical components, making it a reliable choice for professional automotive service environments.

Technical Specifications

Display	21 inch LCD
Language Options	9
System	Android
Lead Screw Fitting	40mm
Advanced Features	Online Support, Automatic A/B/D Value Display, Aluminum Alloy Arm, Anti-Disturbance Shielding, Break Friction Plate
