

Automotive Wheel Balancer with LED Light

This wheel balancer is an essential tool for automotive service and repair shops. It features an aluminum automatic measuring instrument that is more accurate and less prone to deformation compared to plastic measuring instruments.

Product Overview

Professional Precision Wheel Balancing

This advanced automotive wheel balancer is engineered for precision and reliability in high-volume service environments. Featuring a durable aluminum automatic measuring instrument, it provides superior accuracy and long-term stability compared to standard plastic alternatives. The integrated LED illumination and manual foot brake enhance technician efficiency, ensuring perfect placement of wheel weights for every service.

Performance Specifications

Max Wheel Diameter	1180 mm
Rotating Speed	140 RPM
Max Wheel Weight Capacity	75 KG
Wheel Width Range	1.5"-20"

Technical Features

Key Operational Features

- Aluminum automatic measuring instrument
- Automatic LED work light
- Precision foot brake system

Certifications

Standards and Compliance	CE, TÜV, CERT
