

Automotive Wheel Hub Bearing

This high-precision automotive bearing is designed for optimal performance and durability. Constructed from high-quality materials, it offers excellent resistance to wear and corrosion, making it suitable for wheel hubs and other rotating components.

Product Overview

High-Performance Wheel Hub Bearing

This automotive wheel hub bearing (model DAC25520037) is engineered for optimal performance and durability in demanding vehicle applications. Constructed with precision machining and high-quality materials, it ensures smooth rotation and excellent resistance to wear and corrosion. Designed to meet or exceed OEM specifications, this component provides a reliable fit for critical rotating assemblies in various automotive systems.

Technical Specifications

Dimensions

25 mm Inner Diameter (d)	52 mm Outer Diameter (D)	37 mm Width (B)	37 mm Width (C)
------------------------------------	------------------------------------	---------------------------	---------------------------

Bearing Number	DAC25520037
Mass	0.31 kg
Seal Type	D

Compatibility

Compatible Vehicle Makes	RENAULT, PEUGEOT, CITROEN
--------------------------	---------------------------
