Product Overview

Professional Automotive Wheel Hub Bolt

This high-strength wheel hub bolt is precision-engineered for secure wheel attachment in diverse automotive applications. It features a closed-end nut design specifically developed to provide total protection against moisture, rust, and environmental corrosion. Built from high-quality steel, this component ensures reliable performance, safety, and durability for both replacement and upgrade needs.

Technical Specifications

Material	Steel
Net Weight	0.6 Kg
Function	Fixed wheel attachment

Key Features

Benefits	Closed-end design, Moisture resistant, Corrosion protection, High-strength steel
