

Automotive Window Shade with Hot Air Balloon Design

This nylon mesh car shade features a colorful hot air balloon design. Measuring 44*38CM, it is designed for automotive side or rear windows.

Product Overview

Automotive Sun Protection

This automotive window shade provides an effective solution for blocking harmful UV rays and reducing interior heat. Crafted from durable nylon mesh, it is designed for simple installation on windows or doors to maintain a cooler cabin environment. The unique hot air balloon aesthetic offers a decorative touch while ensuring passengers remain protected from direct sunlight.
