

Automotive Wiring Harness Connector

This multi-pin automotive wiring harness connector ensures secure and reliable electrical connections in vehicle systems. The connector features color-coded wires, simplifying installation and circuit identification.

Product Overview

High-Reliability Automotive Connector

This fourteen-hole automotive wiring harness connector is engineered for secure and consistent electrical connectivity in demanding vehicle environments. Featuring a robust housing and color-coded pre-wired leads, it simplifies installation and ensures accurate circuit identification. It is an ideal solution for critical automotive systems including engine management, lighting, and advanced sensor integration.

Technical Specifications

Common Applications

- Engine Management Systems
- Vehicle Lighting
- Sensor Systems
- Electronic Control Units

Number of Positions

14

Connector Type

Automotive Wiring Harness Connector

Key Features

Pre-wired, Color-coded, Robust Housing, Automotive Grade
