

Autonomous Lawn Mower Robot

This autonomous robotic lawn mower is designed for efficient and automated grass cutting. It features a robust, weatherproof chassis, obstacle detection sensors, and a programmable cutting schedule.

Product Overview

Autonomous Efficiency for Lawn Maintenance

This autonomous lawn mower robot is designed to maintain residential lawns efficiently with minimal human intervention. It features intelligent sensors for obstacle detection, rain protection, and tilt safety to ensure reliable operation in various weather conditions. Equipped with an automatic recharging system and PIN-coded security, it offers a secure, hands-free solution for large outdoor spaces.

Technical Performance

Cutting Performance

20 cm

Cutting Width

2.5 cm

Min Cutting Height

5.5 cm

Max Cutting Height

Maximum Working Area

1000 sqm

Maximum Slope

25 degree

Power and Battery

Operating Times

90 min

Work Time

150 min

Charge Time

Battery Capacity

4.4 AH

Safety and Security

Safety and Security Features

Emergency Stop, Lift Sensor, Tilt Sensor, Collision Sensor, PIN Protection, Rain Sensor
