Product Overview

Smart Autonomous Cleaning

This autonomous robot vacuum cleaner offers a professional, hands-free cleaning solution for both homes and offices. Designed with intelligent sensor technology, it navigates complex spaces, avoids obstacles, and prevents falls from edges like stairs. With customizable cleaning modes and a specialized mop function, it delivers thorough results on various surfaces including wood, marble, and carpet.

Technical Specifications

Operation Modes

- Small (S)
- Medium (M)
- Large (L)

Floor Types

Wooden Floor, Marble, Carpet, Tile

Features & Intelligence

Sensor Systems

- 5 sets of wall sensors (5cm clearance)
- 5 sets of intelligent space detection sensors
- Anti-drop edge detection
- Infrared area containment transmitter

Build Design

Compact • Double Side Brushes • Rubber Bumper • Low Noise Construction

Control & Interface

Control Methods

LED Touch Panel, Remote Control
