

Aviation Tin Snips

Aviation tin snips are hand tools designed for cutting sheet metal. They feature compound leverage for increased cutting power and come in various handle colors to indicate cutting direction.

Overview

Professional Aviation Tin Snips

These aviation tin snips are essential hand tools engineered for precision cutting of sheet metal. Featuring a robust compound leverage mechanism, they deliver increased cutting power with minimal effort, making them ideal for demanding tasks. The ergonomic handle design ensures comfort and reduces hand fatigue during extended use, while the hardened steel blades provide long-lasting durability for professional applications.

Technical Specifications

Industry Applications

- HVAC
- Roofing
- Metal Fabrication

Blade Material	Hardened Steel
Mechanism	Compound Leverage
Available Cut Types	Straight, Left, Right

Design & Ergonomics

Handle Identification

Color-coded for direction

Ergonomic Grip	Yes
