

# Axial Fan Blade for Electrical and Exhaust Fans

High-efficiency axial fan blade designed for optimal airflow in electric fans and exhaust systems. Constructed from durable, lightweight plastic material for longevity and reduced motor load.

## Product Overview

### High-Efficiency Axial Fan Blade

This high-efficiency axial fan blade is precision-engineered to provide optimal airflow for a wide range of electrical fans and exhaust systems. Constructed from durable, lightweight plastic, it is designed to reduce motor load while ensuring quiet operation and maximum air displacement. Its aerodynamically optimized profile and balanced rotation make it an ideal replacement or component for household appliances, air conditioning units, and ventilation equipment.

## Physical Properties

Material	Durable, lightweight plastic
Design Features	Aerodynamically optimized, Balanced rotation, Minimal vibration

## Performance & Durability

**Resistance**  
Corrosion resistant • Environmental degradation resistant

## Applications

- Suitable Applications**
- Household electrical appliances
  - Air conditioning systems
  - Ventilation equipment
  - Exhaust systems
