

Axial Fan for Apparel and Textile Machinery

Axial fan designed for cooling applications in machinery and industrial equipment. It features a square frame with mounting holes for easy installation and is constructed with durable materials for long-lasting performance.

Product Overview

High-Efficiency Industrial Cooling

This axial fan is specifically engineered for cooling applications within apparel and textile machinery. Featuring a robust square frame design with integrated mounting holes, it ensures straightforward installation into industrial equipment. The blades are precision-optimized to deliver consistent airflow while maintaining quiet operation, making it an ideal component for demanding manufacturing environments.

Technical Specifications

Primary Application	Apparel and Textile Machinery
Design Features	Square Frame, Optimized Blade Design, Industrial Grade
Installation	Mounting holes included for easy integration

Performance Characteristics

Key Performance Metrics

1 Quiet
Noise Level

1 High
Durability
