

Axial Fan for Apparel & Textile Machinery

Axial fan designed for cooling applications in machinery and industrial parts, specifically apparel and textile machinery. It features a square frame with mounting holes for secure attachment and has multiple blades designed for efficient airflow.

Product Overview

Industrial Axial Fan Solution

This axial fan is specifically engineered for cooling applications within apparel and textile machinery. Featuring a robust square frame with pre-drilled mounting holes, the unit ensures secure and stable integration into industrial equipment. Its specialized multi-blade design promotes high-efficiency airflow, constructed from durable black plastic to withstand demanding operational environments.

Technical Specifications

Key Design Elements

- Multi-blade configuration for optimized airflow
- Square frame geometry
- Durable construction

Body Material	Durable black plastic
Mounting Type	Square frame with integrated mounting holes
Target Industry	Apparel Machinery, Textile Machinery, Industrial Cooling
