

Axial Fan for Apparel & Textile Machinery

Axial fan designed for cooling applications in machinery and industrial equipment. It features a square frame for easy mounting and a multi-blade impeller for efficient airflow.

Product Overview

Industrial Axial Fan

This high-performance axial fan is specifically engineered for cooling applications within demanding industrial environments, including apparel and textile machinery. Featuring a robust square frame design, it ensures straightforward mounting and reliable operation. The multi-blade impeller configuration is optimized to deliver consistent airflow, helping to maintain optimal operating temperatures for your equipment.

Technical Specifications

Design Features

- Square frame for easy mounting
- Multi-blade impeller design
- Industrial-grade durable construction

Environment Suitability

Industrial Environment • High Durability

Primary Application

Textile Machinery, Apparel Machinery, Industrial Cooling
