

Axial Fan for Textile Machinery Cooling

This axial fan is designed for cooling applications within machinery and industrial environments. It features a square frame for easy mounting and a multi-blade impeller for efficient airflow.

Product Overview

High-Efficiency Axial Cooling Solution

This industrial-grade axial fan is engineered specifically for demanding cooling applications in machinery environments, including textile and apparel production. Designed with a robust multi-blade impeller and a square frame configuration, it ensures consistent and efficient airflow to maintain optimal operating temperatures. Its durable construction guarantees long-lasting performance even in challenging industrial settings.

Technical Specifications

Mounting Style	Square frame for simplified industrial installation
Impeller Design	Multi-blade design for enhanced airflow efficiency

Performance Features

Durability Class	Industrial Grade • High Performance
Primary Applications	Textile Machinery, Apparel Equipment, Industrial Cooling
