

Axial Fan for Ventilation Systems

Five-blade axial fan designed for electrical and exhaust fan applications. Blades are constructed from a lightweight metal alloy, optimized for efficient airflow.

Product Overview

High-Efficiency Axial Fan

This five-blade axial fan is engineered for optimal performance in electrical and exhaust ventilation systems. Constructed from a lightweight metal alloy, the design ensures efficient airflow while maintaining structural integrity. It features a secure central hub mounting system, making it a reliable component for various cooling appliances and industrial ventilation setups.

Technical Specifications

Number of Blades	5
Material	Lightweight metal alloy
Mounting Mechanism	Central hub with screw mount

Applications

Suitable Applications	Electrical ventilation, Exhaust systems, Cooling appliances
-----------------------	---
