

Axial Fan with Wire Guard

This axial fan is designed for cooling applications. It features a seven-blade impeller and a protective wire guard.

Product Overview

Industrial Cooling Solution

This axial fan is engineered for high-performance cooling applications across various industrial and machinery environments. Featuring a seven-blade impeller design, it is optimized to deliver consistent and efficient airflow for demanding systems. The unit includes an integrated protective wire guard to ensure operational safety by preventing accidental contact with moving components.

Design & Construction

Number of Blades	7
Safety Features	Wire Guard, Protective Enclosure
Housing Material	Durable plastic/composite

Applications

Suitable Applications

- Industrial Equipment
- Machinery Cooling
- Ventilation Systems
- Forced Air Cooling
