

Axial Flow Industrial Exhaust Fan

This axial flow industrial exhaust fan is designed for ventilation purposes. It features a multi-blade impeller for efficient airflow.

Product Overview

High-Efficiency Axial Flow Ventilation

This axial flow industrial exhaust fan is engineered for robust performance in both household and demanding industrial environments. Featuring a specialized multi-blade impeller, it ensures consistent, high-volume airflow for effective ventilation and air circulation. The unit is housed in a durable square frame with integrated mounting points, facilitating straightforward and secure installation for various air conditioning and ventilation applications.
