

# Axial Flow Ventilation Fan

This axial flow fan is designed for ventilation and air circulation. It features a durable housing and a multi-blade impeller for efficient air movement.

## Product Overview

### Industrial Axial Flow Ventilation Fan

This axial flow fan is engineered for high-efficiency air circulation and ventilation in industrial and commercial environments. The unit features a durable housing and a balanced three-blade impeller design to ensure consistent airflow performance. Designed for easy installation, it includes a robust mounting flange to support various mounting configurations.

## Technical Specifications

Impeller Blades	3
Suitable Applications	Industrial Ventilation, Commercial Air Circulation

## Physical Attributes

Housing Color	Blue
Impeller Color	Red
