

Axial Ventilation Fan for Refrigeration

This high-efficiency axial fan is designed for refrigeration and ventilation applications. It features a robust construction with a protective wire guard and aerodynamically optimized blades.

Product Overview

High-Efficiency Axial Fan

This axial ventilation fan is specifically engineered for high-performance refrigeration and industrial ventilation applications. It features aerodynamically optimized blades for superior airflow coupled with low-noise operation, ensuring reliable cooling for condensers and evaporators. Built for endurance in demanding environments, it combines robust mechanical construction with an advanced external rotor motor.

Technical Specifications

Protection Class

IP54

Operating Temperature

-40 °C

Minimum Temperature

70 °C

Maximum Temperature

Insulation Class

Class F

Design & Construction

Blade Material

High-strength composite

Motor Type

External rotor motor

Application

Suitable Systems

Condensers, Evaporators, Industrial Ventilation
