

B Ultrasound Cooling Fan

This 80x80x15mm cooling fan is designed for B ultrasound and other electronic devices. It provides efficient airflow to dissipate heat and maintain optimal operating temperatures.

Product Overview

Efficient Cooling for Medical Electronics

This 80x80x15mm cooling fan is specifically designed for B ultrasound machines and various electronic devices requiring reliable thermal management. Its slim profile and durable construction ensure efficient airflow to dissipate heat, maintaining optimal operating temperatures during critical procedures. This fan provides a dependable solution for applications where consistent cooling performance is essential for equipment longevity.

Physical Dimensions

Fan Dimensions

80 mm

Width

80 mm

Height

15 mm

Thickness

Technical Specifications

Key Features

- Efficient airflow dissipation
- Durable construction
- Compact 15mm thickness
- Reliable cooling performance

Primary Application

B Ultrasound Equipment

Compatible Devices

B Ultrasound, Electronic Devices, Medical Equipment, Thermal Management

Operational Benefit

Maintains optimal operating temperatures
